About the Job

Loopback Analytics is looking for a Product Manager who will work closely with the Loopback development team to create and manage the next generation of products. This role requires exceptional project management and interpersonal skills and the ability to think collaboratively to overcome challenges. Someone who is excited about the possibilities of big data in health care will be the right candidate for this position.

What You'll Do

- Bridge technical and business worlds to design products that meet customer needs
- Guide products throughout the execution cycle, from design to implementation
- Research customer needs and evaluate market opportunities
- Collect, organize, and vet customer feedback
- Create and maintain product roadmaps
- Prioritize new initiatives and feature requests for existing products
- Manage resources available to efficiently bring new products to market and perform timely enhancements on existing products
- Report frequently to management on the development team's progress

Requirements

Personal Characteristics:
- Strong independent worker/ self-starter
- Well-organized, detailed, timely
- Entrepreneurial attitude
- Innovative and creative business-minded thinker
- Confident and well-spoken communicator

Desired Experience:
- 3-5 years of experience as a product manager (healthcare technology or SaaS experience is a plus)
- Experience with visualization software (Power BI, etc.)
- Strong understanding of Agile methodologies and frameworks
- Thorough knowledge of Jira or other project management software
- Familiarity with full tech stack a plus, from base-layer languages (Java, etc.) to high level languages (Python, SQL, etc.)

Travel:
- Minimal

Contact
