

About the Job

Loopback Analytics is seeking an Application Support Analyst. This position will be primarily responsible for ensuring all aspects of Loopback's systems and applications are performing as designed, investigating critical system issues, and escalating issues as needed to other departments. Strong collaboration skills will be required to work closely with other teams to ensure services and systems are highly available, reliable, and meeting the expectations of our solutions team and end users. The ideal candidate will possess excellent problem-solving skills, a strong technical aptitude, and have good organizational skills with the desire to learn and work in a fast-paced environment.

Duties to Include

- Provide level 2 support for the Loopback platform and applications, escalate issues according to guidelines, and track to resolution
- Support daily data integration processes, to include multiple real time data feeds, for business continuity and troubleshoot issues as they arise
- Identify gaps in systems and processes that would cause incorrect data and performance issues
- Document and analyze the most common system/user issues for future reference
- Assist with development and analysis of improvements to current procedures
- Provide weekly communications to executive team, other departments, and internal business partners on system performance and current open items (this includes reporting data feed status, server/system issues, and operational reports)
- Participate in on-call rotations and respond to system alerts

Requirements

Personal Characteristics:

- Comfortable interacting with both technical and non-technical people
- Strong independent worker/self-starter
- Strong problem-solving and diagnostic skills
- Ability to work with aggressive schedules and deadlines
- Excellent program/task management skills
- Detail oriented
- Flexible and can quickly adapt to a changing and fast-growing environment

Required Experience:

- Microsoft SQL Server 2008/2012/2016, Azure SQL
- Microsoft Visual Studio 2010/2013, C#, ASP.Net, XML, Web Services
- Microsoft Windows services, LAN/WAN networking
- Microsoft windows operating systems
- Microsoft Integration and Reporting services
- Minimum of two years of application support, preferably in healthcare applications

Education: Bachelor's Degree (preferred)

Travel:

- None
