

About the Job

Come join the Data Integration group of a dynamic analytics services leader in the challenging healthcare industry. Loopback Analytics is currently looking for a Data Integration Analyst who will work directly with the Implementation team to establish and maintain data flows between Loopback Analytics and its clients. The ideal candidate will have experience interfacing with external IT resources, possess a strong technical aptitude with good organizational skills and a desire to learn and work in a dynamic, fast-paced environment. The Data Integration Analyst will also have excellent problem-solving skills and exhibit strong verbal and written communication skills.

Duties to Include

- Implement a multi-step process to extract, transform and load new client data to Loopback system
- Support daily data integration processes for business continuity and maximum delivery of services
- Support multiple real-time data feeds and troubleshoot issues as they arise
- Analyze and resolve data related problem tickets
- Work effectively with and support multiple departments within the company
- Participate in on-call rotation (limited to non-business hours and alternates with other team members)

Requirements

Personal Characteristics:

- Exhibits a “self-starter” mindset in taking ownership over delegated responsibilities
- Tenacious self-learner
- Excellent program/task organizational skills
- Detail and results oriented

Required Experience:

- Microsoft SQL Server 2008/2012/2016, Azure SQL.
- Microsoft Visual Studio 2010/2013, C3, ASP.Net, XML, Web Services
- Microsoft SQL Server Integration Services
- Database architecture, stored procedures and functions
- Azure cloud services
- C#, Python

Preferred Experience:

- Hospital EMR systems and data
