University of Virginia Health System

About UVA

UVA Health is an academic health system with a world-class academic medical center including a level 1 trauma center, an NCI-designated Comprehensive Cancer Center, and UVA Children's. UVA Health also encompasses 3 community hospitals and an integrated network of primary and specialty care clinics throughout Charlottesville, Culpeper, Northern Virginia, and beyond. Through teaching and research, we continue to advance medicine and innovate excellence while providing high-quality care.

Delivery Pharmacy Services**

Q: What exciting initiatives does UVA have in the upcoming year?

UVA Health is excited to expand on our mission to create "One Future Together" as we transform healthcare. Our specialty pharmacy's innovative and integrated care model is continuing to grow. We are excited to continue our efforts of providing Accessible and Affordable care to all patients so they can live happier and healthier lives. Unlocking both limited distribution drug and payer networks will continue to be our number one opportunity and we look forward to driving success in this area via all the investments, strategies, and tactic we've recently implemented.

Q: Where do you see Health System Specialty Pharmacy going over the next five years?

HSSP is poised to capitalize on the shift to value-based care delivery models. We need to be able to collectively align on clinical, financial, and administrative outcomes as our value proposition exponentially grows when we are able to benchmark and baseline our ability to drive cost effective and high-quality care. I'm excited to partner directly with payers, pharma, and providers as we work together to bring innovative care models to patients that need it most.
